# **UNL** Beamer Theme

Christopher M. Bourke

University Of Nebraska - Lincoln

Spring 2005

cbourke@cse.unl.edu

## Introduction

UNL Beamer Theme

Christopher M. Bourk

Beamer is a wonderful LATEX document class that produces high quality PDF slide presentations.

Moreover, you can customize and develop your own themes!

## **UNL** Theme

#### **UNL Beamer Theme**

Christopher M. Bourk

This theme was developed for the University of Nebraska–Lincoln.

The theme itself was developed from the PaloAlto, sidebar and sidbartab themes available by default in beamer.

However, this theme has several unique features and customizations:

- The color theme uses UNL's "scarlet and creme" colors.
- Improved spacing.
- Math mode preserves LATEX's serif font.
- Incorporates UNL's Logo automatically.
- Unique drop shadows on the top and side bars!

## Other Features

#### **UNL Beamer Theme**

hristopher M. Bourk

For convenience, if you are in handout mode, all features, including the navigation symbols at the bottom right are shut off!

Beamer boxes are by default, rounded and have a drop shadow. All beamer boxes (definition, theorem, etc) have the same color scheme.

### **Definition**

This is my definition

$$A = \{p \mid p \text{ is prime }\}$$

## **Theorem**

The set A is countable.

# How To Use The Theme Theme Options

UNL Beamer Theme

hristopher M. Bourk

To use the UNL Theme, after your document class declaration, simply use:

\usetheme{UNLTheme}

To pass options to the package, use

 $\verb|\usetheme[left,hideothersubsections,width=2.5cm]| \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0.5) \} | \{ (1.5,0$ 

There are also several options that you can pass:

- hideothersubsections This hides subsections in the sidebar other than the subsections of the current section.
- hideallsubsections This option doesn't print any subsections in the sidebar.
- width sets the width of the sidebar, default is
  2.5\baselineskip
- height sets the height of the header, default is
  2.5\baselineskip
- left sets the sidebar to the left of the slide (default).
- right sets the sidebar to the right of the slide.

## How To Get The Theme

UNL Beamer Theme

hristopher M. Bourk

The theme is available from my home page, http://www.cse.unl.edu/~cbourke/

You need You need beamerthemeUNLTheme.sty and UNL.pdf (the UNL logo).

Place them in the working directory or add them to beamer/themes/theme or somewhere in your LATEX path and you're good to go!
